**CAST STEEL GATE VALVES
ASME CLASS 2500 LBS.**

INDUSTRIAL VALVES

Fig. VS25

DESCRIPTION AND FEATURES

BOLTED BONNET
OUTSIDE SCREW AND YOKE (OS&Y)
RISING STEM
NON RISING HANDWHEEL
SOLID or FLEXIBLE WEDGE
RENEWABLE SEATS
<i>on request : ISO 5210 TOP FLANGE, LOCKING DEVICE,...</i>
<i>SEE DERVAL'S SPECIAL FEATURES FOR FURTHER EXECUTION</i>

GENERAL DESIGN SPECIFICATIONS

Design	ASME B16.34 / API600 / BS1414 / ISO 10434
Face to Face	ASME B16.10
End Flange	ASME B16.5 (2" ~ 24") ASME B16.47 (≥ 26")
BW Ends	ASME B16.25
Test	API 598 / API 6D / BS 6755 / EN 12266
Marking	MSS-SP25 / CE P.E.D. (2014/68/EU)
Special	NACE MR 01.75 - 01.03/ATEX 2014/34/EU(Ex)

MAXIMUM ALLOWABLE NON-SHOCK WORKING PRESSURE:

T (°C)	-29 ~ 38	50	100	150	200	250	300	350	375	400	425

(1): Base material shall be at least equal in corrosion resistance to the body material (Acc. to API 600 Std.)

(2): Base material only. See trim material for wedge surface

Stainless Steel: At temperatures over 538°C, use the material only when the carbon contents is 0.04% or higher.

Derval S.r.l. reserves the right to substitute materials listed above with alternative material approved for designated service

TRIM MATERIALS (API 600 STANDARD)

The API TRIM N° 8 is supplied on Derval Valves as standard trim. Materials for other trims are in accordance with the following table. Other trims also according to customer's requirement.

TRIM N°	1	2	5	8	9	10	11	12	13	14	15	16	17

Note: The chart above only lists out some common composition of steel gate valve parts. We may provide other different parts material composition according to the customer's request or based on the actual valve working condition.

PRESSURE - TEMPERATURE RATINGS

The following pressure-temperature charts are derived from ASME B16.34. They will cover the most commonly used body and bonnet materials in the industry. All Derval Valves are designed to operate through the pressure and temperature ranges shown in these charts for a particular ASME Class Rating and ASTM Material.

Pressure temperature ratings are based on ASME B16.34 (bar/°C)

a) Permissible, but not recommended for prolonged usage above 427°C (800°F)

b) Not to be used over 343°C (650°F)

c) Permissible, but not recommended for prolonged usage above 468°C (875°F)

d) Not to be used over 593°C (1100°F)

e) At temperature over 538°C (1000°F), use only when carbon content is 0,04 or higher

f) Not to be used over 427°C (800°F)

g) Not to be used over 454°C (850°F)

APPLICATION:

Derval gate valves are used as efficient shut-off valves with flow in either direction for water, saturated steam, air, gas, oil and crude oil products. They are utilized in applications where minimum pressure drop is necessary.

Due to their specific design, gate valves should be operated in the full-open or full-close position. Concentrated flow across the seats of a partially opened gate valve risks possible seat damage, therefore throttling is not recommended.

Operating parameters are in accordance with ASME B16.34 standard.

INSTALLATION:

Derval gate valves are normally installed in horizontal pipe with vertical stem (handwheel up).

The high quality Derval valves are installed in a large variety of services in the Oil & Gas field, Chemical and Petrochemical industry, in On-shore and Off-shore drilling/refining, Power Generation, Water and Wastewater Treatment industries.
